APXX™

FULL-SIZE VACUUM EXCAVATOR

OUTWORK YOUR JOBSITE

Engineered for maximum payload, nonstop productivity.

Performance doesn't happen by accident. It's engineered.

The APXX is built to move more material, stay on the job longer and power through demanding excavation environments with fewer interruptions. From payload to uptime, every system is designed to maximize productivity in the field.

- Payload-maximized debris body and chassis configurations
- High-performance blower and boom system for faster excavation
- Fast, efficient offloading with 50° dump angle and large rear door
- Integrated systems engineered to reduce downtime and simplify maintenance
- Operator-focused controls and ergonomic design for long shifts
- Air and hydro excavation versatility across applications and environments
- Vactor-backed support with responsive service and next-day parts availability

PRODUCTIVITY
Move more material and complete more work per day.

PAYLOAD
Maximize legal payload to reduce trips and improve efficiency.

UPTIME
Integrated systems and responsive support keep crews working longer.

APXX™

FULL-SIZE VACUUM EXCAVATOR

APPLICATIONS

Built for demanding work across:

- Oil, gas, power and telecom work
- Utility locating and daylighting
- Industrial and environmental cleanup
- Municipal and infrastructure projects
- HDD support and trenching applications

KEY SPECIFICATIONS

Debris Capacity: 12-or-14-yd³ spoils tank

Water Capacity: 1,200-gallon freshwater tank

Vacuum System: 27" Hg Tri-Lobe blower @ 5,250 cfm

Water Pump: 10 gpm @ 3,000 psi standard, 20 gpm optional

Boom: 24.5' reach with 320° rotation

and standard 16" boom turret, 27' reach optional

Chassis Configurations

Multiple axle configurations available, including tandem, tri-drive and SPIF-23

CONFIGURED FOR YOUR OPERATION

Adapt APXX to your fleet and environment:

- Multiple axle configurations for legal payload optimization
- Air excavation package: 185 cfm x 150 psi
- 400k or 800k BTU water heater options
- 20 gpm @ 3,000 psi high-volume water system

BUILT FOR THE OPERATOR

- Back-up camera for improved visibility and safety
- Boom/body out-of-position light and alarm system
- Heated cross cabinet with water components and tool storage
- Extendable or telescoping boom options for improved reach
- Classic controls system designed for quick troubleshooting and maintenance

BACKED BY VACTOR SUPPORT

Performance doesn't stop at the machine.

- Coast-to-coast dealer and service network
- Responsive parts availability to minimize downtime
- Training and support for safe, effective operation
- Commitment to uptime, reliability and long-term performance
